Information on Semester.ly

Johns Hopkins University (JHU) is committed to improving the undergraduate experience. One of the ways we are doing that is to make registering for classes and developing a smoother process. To that end, the Registrar's Office recently integrated into the registration experience the program known as [Semester.ly](https://jhu.semester.ly) (<https://jhu.semester.ly>).

Semester.ly is a comprehensive scheduling planning tool designed, in part, by JHU alum Noah Presler. Semester.ly is used to find classes that fit your schedule, provide you access to course evaluations, ratings, textbooks and so much more. Based on student feedback, the Registrar's Office and IT@JH collaborated with a team of JHU Computer Science students to integrate Semester.ly with SIS registration by allowing students to directly export their planned schedule from Semester.ly into their enrollment cart in SIS.

Now, with the click of a button  you'll be able to transfer your entire Semester.ly plan into your SIS cart as you prepare for registration. Once in your SIS cart, you will be able to submit your course registration as usual.

Please look at the screen shots below for an example:

The screenshot displays the Semester.ly web application interface. At the top, there is a navigation bar with the Semester.ly logo, a dropdown menu for the semester (Fall 2018), and a search bar. Below the navigation bar is a weekly schedule grid with columns for Monday through Friday and rows for time slots from 8:00 to 5:00. A red box highlights a share icon in the top right corner of the grid. To the right of the grid is a sidebar titled "Untitled Schedule" which shows the total credits (16.00), an average course rating (4.5 stars), and a list of current courses with their details and options to lock or remove them.
