There were 29 submissions, some with more than one joke. There were many brownie-in-motion jokes, and I couldn’t single any one out!

------------------

Why is Brownian Motion so complicated? According to Dr. Wierman's drawings, it always looks the same.

------------------

Much to Dr. Wierman's disappointment, the number of empty seats in his class forms a submartingale.

------------------

Jeff wished that his studying process was more like a general renewal process than a Poisson process - he would be much better off retaining information if he wasn’t necessarily dealing with memoryless-ness.

------------------

A drunk student was running up and down Saint Street Paul while his utterly bored friends watched from afar. Professor Wierman approached the group and, in an act of consolation, said: "Don't worry, guys. I am sure he will return, but it will take forever."
