

**CHEMICAL AND BIOMOLECULAR
ENGINEERING DEPARTMENT**

presents

**Fall 2019
Seminar Series**

September 5: **Ron Dror**, Stanford University
Computer Science

September 12: **Laura Ensign**, Johns Hopkins University
Ophthalmology - Nanomedicine for Preterm Birth

September 19: **Rosa Espinosa-Marzal**, University of Illinois
Environmental Engineering and Science - Examining Soft Matter Interfaces

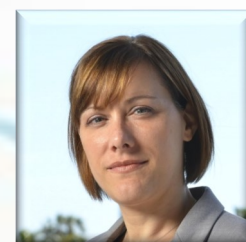

The William H. Schwarz Lecture
September 26: **Thomas Russell**, University of Massachusetts, Amherst
Macromolecules Education - Structuring Liquids

October 3: **Howard Berg**, Harvard University
Physics, Molecular and Cellular Biology - Wonders of Bacterial Motility

October 10: **Sarah C. Heilshorn**, Stanford University
Material Science and Engineering

October 17: **Rizia Bardhan**, Vanderbilt University
Chemical and Biomolecular Engineering and Biomedical Engineering

October 24: **Meni Wanunu**, Northeastern University
Nanoscale Biophysics

October 31: **Nicholas Stephanopoulos**, Arizona State University
Molecular Design and Biomimetics

November 7: **John Kitchin**, Carnegie Mellon University
Chemical Engineering

November 21: **Prashant Mali**, University of California, San Diego
Bioengineering - Therapeutic Strategies via Genome Engineering: New Approaches and New Challenges

December 5: **Laura Segatori**, Rice University
Bioengineering, Chemical & Biomolecular Engineering and BioSciences

**Thursdays @ 10:30-11:30am
Maryland 110**
