June 11, 2014

Dear Student,

Welcome to the Engineering Innovation course at the California State University, Fullerton campus! We are few weeks from beginning the course and we are very excited to have you as summer 2014 participant.

Engineering Innovation is a college-level course that introduces high school students to engineering. During the course, we cover mechanical, civil, electrical, chemical, and materials engineering. This is an intense, 4-week course that requires your dedication and focus during the day and in the evening. I am confident that you will be challenged and that you will also have fun while exploring the engineering disciplines.

Your Engineering Innovation teachers are:

Binod Tiwari, PhD
Assistant Professor
Civil and Environmental Engineering
btiwari@fullerton.edu

Katie Henderson
Chemistry Teacher
Buena Park High School
'KAHenderson@fjuhsd.k12.ca.us'

On the first day, we will meet in the Engineering and Computer Science (ECS) Quad (between the 2 ECS buildings). I will be waiting there to greet everyone.

Because we will be spending considerable time in the lab during the 4-weeks, students are required to wear closed-toe shoes. If you want to wear flip-flops or sandals for the lecture portion of class, please remember to bring appropriate shoes to change into for the labs.

Students will be given a 1 hour lunch break, 12:00p – 1:00p. Last year we had students leaving campus to get lunch from various fast food locations in the area. Please discuss with your parent as to their expectations during this break.

In addition, an information sheet has been attached for more information regarding the program.

Please feel free to contact me with any questions or concerns.

I look forward to meeting you on June 30th!

Victor H. Delgado
Assistant Dean
College of Engineering & Computer Science
