

- 1 Can barotropic tide–eddy interactions excite internal waves?
M.-P. Lelong & E. Kunze
- 28 Stationary ideal flow on a free surface of a given shape
L. Tophøj & T. Bohr
- 46 Study of polygonal water bells: inertia-dominated thin-film flows over microtextured surfaces
E. Dressaire, L. Courbin, A. Delancy, M. Roper & H. A. Stone
- 58 The emergence of localized vortex–wave interaction states in plane Couette flow
K. Deguchi, P. Hall & A. Walton
- 86 Rapid gravitational adjustment of horizontal shear flows
B. L. White & K. R. Helfrich
- 118 A multi-fidelity modelling approach for evaluation and optimization of wing stroke aerodynamics in flapping flight
L. Zheng, T. L. Hedrick & R. Mittal
- 155 Effect of turbulent fluctuations on the drag and lift forces on a towed sphere and its boundary layer
H. Homann, J. Bec & R. Grauer
- S 180 Off-plane motion of a prolate capsule in shear flow
C. Dupont, A.-V. Salsac & D. Barthès-Biesel
- 199 Thermal boundary layer structure in turbulent Rayleigh–Bénard convection in a rectangular cell
Q. Zhou & K.-Q. Xia
- 225 Volume displacement effects during bubble entrainment in a travelling vortex ring
A. J. Cihonski, J. R. Finn & S. V. Apte
- 268 Variable density and viscosity, miscible displacements in horizontal Hele–Shaw cells. Part 1. Linear stability analysis
L. Talon, N. Goyal & E. Meiburg
- 295 Variable density and viscosity, miscible displacements in horizontal Hele–Shaw cells. Part 2. Nonlinear simulations
M. O. John, R. M. Oliveira, F. H. C. Heussler & E. Meiburg
- 324 Nonlinear analysis of shock–vortex interaction: Mach stem formation
P. Clavin
- 340 New conservation laws of helically symmetric, plane and rotationally symmetric viscous and inviscid flows
O. Kelbin, A. F. Cheviakov & M. Oberlack
- 367 Ultra-fast escape of a deformable jet-propelled body
G. D. Weymouth & M. S. Triantafyllou
- 386 Edges in models of shear flow
N. Lebovitz & G. Mariotti
- S 403 Transient force generation during impulsive rotation of wall-mounted panels
A. Pierides, A. Elzawawy & Y. Andreopoulos
- 438 Visualization of the Ludford column
O. Andreev, Y. Kolesnikov & A. Thess
- 454 Large-eddy simulation of three-dimensional dunes in a steady, unidirectional flow. Part 1. Turbulence statistics
M. Omidyeganeh & U. Piomelli
- 484 Flame wrinkle destruction processes in harmonically forced, turbulent premixed flames
D.-H. Shin & T. Lieuwen
- S 514 Revealing the state space of turbulent pipe flow by symmetry reduction
A. P. Willis, P. Cvitanović & M. Avila
- 541 An explicit algebraic model for the subgrid-scale passive scalar flux
A. Rasam, G. Brethouwer & A. V. Johansson
- 578 Multi-species turbulent mixing under supercritical-pressure conditions: modelling, direct numerical simulation and analysis revealing species spinodal decomposition
E. Masi, J. Bellan, K. G. Harstad & N. A. Okong'o
- 627 Acceleration in turbulent channel flow: universalities in statistics, subgrid stochastic models and an application
R. Zamansky, I. Vinkovic & M. Gorokhovski

Journal of Fluid Mechanics

VOLUME 721

VOLUME
721

25 Apr.
2013

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. The subscription price (excluding VAT but including postage) for volumes 714–737, 2013, is £3037 or \$5605 (online and print) and £2657 or \$4654 (online only) for institutions; £867 or \$1606 (online and print) and £824 or \$1432 (online only) for individuals. The print-only price available to institutional subscribers is £2902 (US \$5108 in USA, Canada and Mexico). Single volumes cost £131 (US \$233 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

COPYING

The Journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2013/\$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on journals.cambridge.org/FLM. For further information on other Press titles access cambridge.org/.

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see www.fsc.org for information.

Printed in the UK by MPG Printgroup Ltd.

The picture on the cover (reproduced with kind permission from Tyson Hedrick & Hartley Tempest) shows a hovering hawkmoth feeding from a lily as depicted in 'A multi-fidelity modelling approach for evaluation and optimization of wing stroke aerodynamics in flapping flight', by L. Zheng, T. L. Hedrick & R. Mittal.
